COR-0751-60

Copy 2 of 5

1 February 1960

Dear Jack:

Reference your letter of 18 January 1960 regarding use of test facilities at Boston for program.

We have no objections to use of such facilities. However, approval is subject to receipt of a satisfactory security plan.

Very truly yours,

SIGNED

Dan

COR-0742-60
COPY 1 OF 2

18 January 1960

25X1

Dear Dan:

Your TWX was received here before I had the opportunity to give you this information. called me and asked that in planning for component testing the Corona laboratory be used on a non-interference basis. I told him that I felt it would be entirely in order, as we used other Government equipment on a non-interference basis and that I would obtain approval for this use. As far as the security aspect is concerned, the engineering people will be in the 128 plant, but will have no connection with the Corona laboratory area. The only testing that is being planned at the 128 plant is that of components only and the Corona cleared people will do the testing on a non-interference basis with the Corona project having priority.

It is intended that ITEK will draw up a security plan and forward it to LMSD for approval, at which time it will be submitted to Mr. before anything is done in this area. Will you please let me know if you have any objection to this no interference use of the Corona test equipment.

25X1

I am sending a copy of this letter to so that he may be aware of the security aspects.

25X1

Very truly yours,

Jack
